

INTERNATIONAL
TRANSPORT
WORKERS'
FEDERATION

NO MATTER WHO WE ARE, OR WHERE WE WORK WE ALL WANT SAFE AND SUSTAINABLE RAIL

RAILWAYS ARE THE KEY TO A ZERO-CARBON FUTURE

From its relatively low emissions to the small carbon footprint of railway infrastructure
— railways tick all the boxes.

**Public railways can help us chart a new course.
Here's our vision for railways:**

1. SAFE

Properly staffed and decent jobs for railway workers
— to ensure optimum safety and guarantee access for all

2. SUSTAINABLE

Millions of good, green jobs in railways to help decarbonise freight and public transport

3. SOCIAL JUSTICE

Rail should be publicly accountable, with workers, passengers and citizens involved in decision-making. Social justice means that railways are inclusive and accessible to people with disabilities and for all

4. PUBLIC

Railways that operate for good, not profit, and are safely in public hands

**SAFE &
SUSTAINABLE
RAIL**
